

It would be a shocking travesty of charity and justice to close the Morgan Center. We raised our son, Eric, at home for 16 years after his diagnosis of autism spectrum disorder at age 2 1/2. Eric is also profoundly developmentally delayed and a type-one diabetic. His admittance to the Morgan Center and the compassionate care he receives there saved his life and our sanity. Please don't close the Frances Hadden Morgan Center.

Sincerely,

Donald & Shirley
